

Figure 1: The normalized average objective value with the instance sizes fixed to 30 and 60.

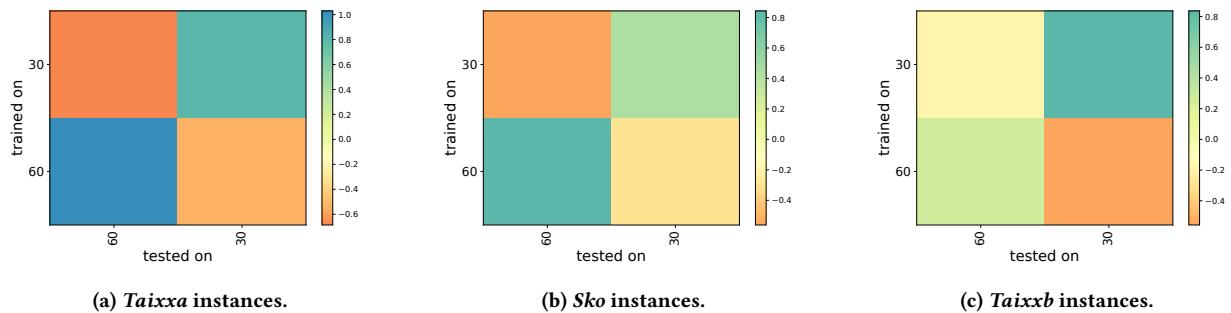

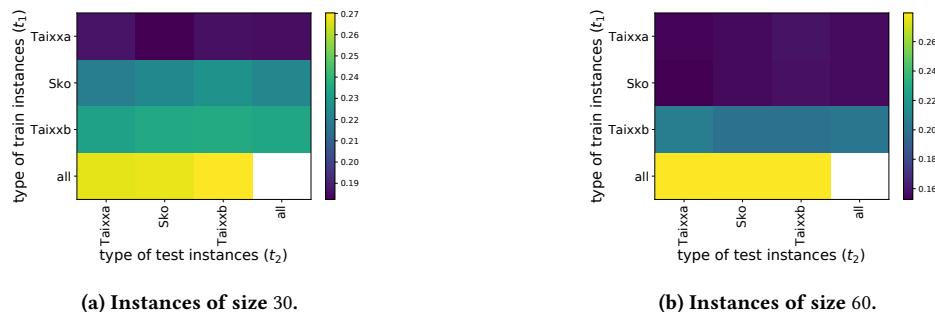

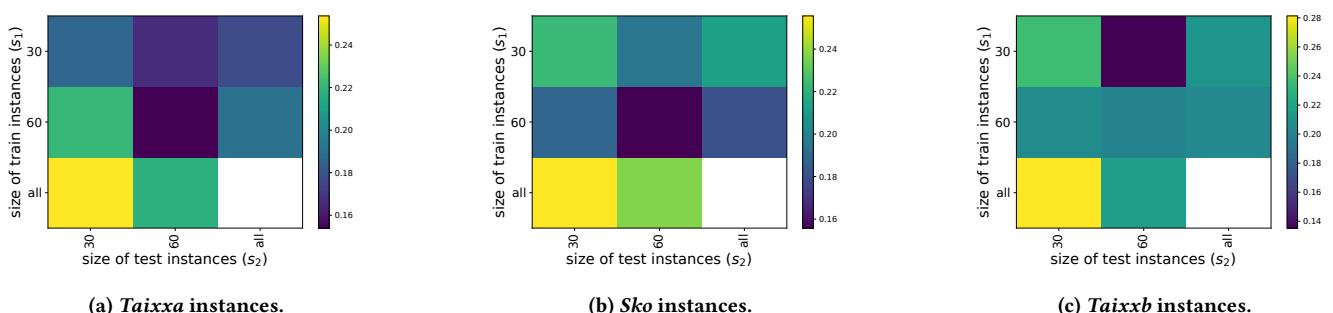

Figure 2: The normalized average objective value with instance types fixed to *Taixxa*, *Sko* or *Taixxb*.

Figure 3: The average L1 distance to the average response (variance) for instance sizes fixed to 30 and 60.

Figure 4: The average L1 distance to the average response (variance) with instance types fixed to *Taixxa*, *Sko* or *Taixxb*.
